

ENVIRONMENTAL POLICY

eCon Engineering Kft., aware of the need for conservation and protection of the environment, assumes the commitment to prevent and minimize environmental impacts arising from its activities.

The Management is committed to aligning environmental management, quality management, and prevention of occupational hazards, as well as the organization's strategies, establishing environmental goals and objectives, assigning responsibilities, resources and deadlines, always based on continuous improvement and sustainable development, thus reducing the environmental impact of our activities.

We support all strategies and approaches focusing on a more sustainable future. We comply with all applicable environmental laws, rules and regulations, and expect our business partners to also be committed to sustainability. Our mission is to reduce our negative impact on the environment, therefore, in our everyday operation, we are focusing on environmental topics including, but not limited to:

- energy efficiency
- renewable energy
- carbon reduction
- recyclability and waste reduction

The protection of our environment is one of the most fundamental topics of our time and concerns us all. For eCon Engineering Kft., to protect our environment means to contribute to a sustainable relief of the environment. The targets have been defined in eCon Engineering Kft.'s environmental policy.

Our commitment, the base of this environmental policy, aims to:

- We wish to minimize the environmental impact caused by the development, manufacturing and use of our products.
- We pay great attention to environmental standards when making our decisions.
- We are aware of our responsibility for the environment of future generations.
- We wish to make an active contribution to climate protection by conserving natural resources.
- We comply with applicable environmental legislation and regulations, and with other requirements derived from the needs and expectations of our business partners.
- We train and sensitize employees in order to promote their environmental commitment.
- We promote and allocate resources for the efficient use of electricity consumption, in an environment of sustainable development and reduction of emissions of greenhouse gases and other pollutants.

Management extends this commitment to all employees of eCon Engineering Kft., so that they keep in mind all the environmental requirements and comply with the guidelines of this policy; this will be periodically reviewed to ensure that they are always appropriate to the nature, magnitude and environmental impacts of the activities, products and services offered by this organization.

Budapest, 2023.06.01.
